

Remember to inspect garments before drying to ensure that all stains have been removed. “Drying stained garments will bake stains into fibers,” cautions Brad Singer, vice president at EISCO, which supplies the cleaning products used to launder the uniforms for most Major League Baseball teams. If stains are still visible after a wash, keep washing until they’re gone. Singer also recommends treating stains as soon as possible. He sees to it that baseball uniforms are washed almost immediately after games. “The longer the wait, the harder it is to get stains out,” he says.
